

ENVIRONMENTAL POLICY

Barry Bros. Specialised Services is committed to responsible management of all our property maintenance operations with the least possible impact on the environment.

To ensure environmental responsible behaviour is accepted as an integral part of our operations, we are committed to:

Ensuring that an environmental risk analysis is performed on all projects and that work methods are created which will minimise harm to the environment;

Examining opportunities to effectively manage waste products which are created by our processes;

The education of our employees, subcontractors and suppliers, to ensure that the requirements for environmental responsibility are integrated into our work practices and training, and are included in performance assessment;

The use of materials and products in our processes which have the least environmental impact;

Positively contribute to enhancing the environment through innovation and process development;

Monitoring our environmental management performance on a regular basis;

Continuous improvement of our Environmental Management System by conducting regular system audits and;

Regular communication of our environmental initiatives to our staff, customers and shareholders.

A handwritten signature in black ink, appearing to read 'M Findlay'.

Max Findlay,
Managing Director
